The Foreign Ministry has already received satisfactory dispatches from London, Paris, Berlin and Rome, all saying that the governments there have not the slightest intention of intervention in Servia's internal affairs, and expressing the hope that peace and order in the political situation will soon be restored.

An official statement of Russia's position has not been received, but according to reliable information. Russia has no desire to intervene; and will not object to the election of Prince Karageorgevitch. The official bulletin issued today is confined to the publication of messages of congratulation received by the provisional government. It is known that the murdered Premiet, Markovics, resigned his portfolio only a few hours before his assassination. His action was the result of his greence of opinion with King Alexander concerning the meeting of the new Skupshtina. The late King, fearing a disturbance, proposed to the Premier that the leading members of the opposition papers, should be arrested before the opening of Parisisment, that the result of head premier did not objected to the after procedure, and therefore resigned. It transpired that Queen Draga, in an audience with the Foreign Minister, a few weeks ago, said she lived in deadly fear, not knowing what the day or night might bring forth. There were two conferences yesterday between Mr. Cromwell, attorney for the New Panama Canal Company, and the President, and the outlook was discussed at length. There have been intimations that the President would take up the matter of the canal concession with the government of Nicaragua promptly, if a disposition should be shown at Bogota to wring more money from the United States for the Panama concession. The demand for a larger price for a concession is expected, and there is some apprehension that individual demands for a reward will cut some figure in the situation.

A prominent administration effects declared today that this was 'merely the bursting of one bubble—the others will break soon.' But this is one in which the government is peculiarly it volved, and consequently it can express its disapproval of unrestrained paper speculation. The contracts which the various yards of the shipbuilding trust have with the government, aggregate more than \$25,000,000.

One danger feared is that, with rival sets of stockhelders and directors constantly fighting each other, there will be little energy in the yards of the shipbuilding trust, and work on government warships will be delayed. But still greater danger lies in the probable action of the directors of the company, in the event the government should try to take any of the warships away for more rapid completion elsewhere. Such action, it is anticipated, would bring forth an injunction from the creditors of the shipbuilding company prohibiting the government from taking this step. Many of the warships now building in the yards of the shipbuilding trust-notably the Ohio, at the Union Iron Works—are far behind in their construction now, but for good reason, seen as labor disturbances and lack of material, and not on account of the juegling of the affairs of the company.

TRIENNIAL SAENGERFEST.

Formal Opening Takes Place at Baltimore With a "Welcome Concert"—The President to Make an Address.

[BY THE ASSOCIATED PRESS—P.M.]

BALTIMORE (Md.) June 14.—The formal opening of the twentieth criennial Saengerfest of the Northeastern Saengerbund of America took place here this afternoon with a reception concert in the Fifth Armory Hall. The seating capacity of the Auditorium of this immense structure is 16,000, and the entire space was occupied, there being 5000 singers on the stage and 5000 persons seated on the floor. The hall had been elaborately decorated for the occasion, presenting a scene of dassiling brilliancy and artistic beauty. Upon the walls, and pendant from the occasion, presenting a scene of dassiling brilliancy and artistic beauty. Upon the walls, and pendant from the cellings of the arched roof, there were a lavish display of American and German national flags, gay bunting and streamers, and a profusion of evergreens, smilax and palms and potted plants met the eye in every direction. This afternoon's concert was mainly designed as a welcome to the singing suests from other cities. Twenty-right hundred singing-school children were arranged in honor of the twenty-right anniversary of the reception of the Stars and Stripes by the American Saengerbund. It is estimated that there will be an attendance of 49,000 during the Saengerfest. Entertainment has been arranged for the various visitors at the hotels and boarding-houses, while thousands will be housed at private residences.

HITCH IN NEGOTIATIONS

PEKING, June 14.—It is expected that the United States will object to the transfer of the negotiations for the American and Japanese commercial treaties from Shanghai to this city, as it is impossible for the American commissioner to come to Peking. An edict ordering the transfer has been issued without consulting-either the United States or Japan, which omission is considered as discourteous to the two powers concerned. The Japanese negotiations have been suspended, and are at a deadlock, owing to China's refusal to discuss Japan's demand for the insertion of a clause in the treaty for the opening of Mukden and other centers to foreign trade.

Strike Leaders.

Soldiers and Officers.

MORENCI (Ariz.) June 14.—Interest of the entire camp was centered yesterday in the trial of the union strike leaders before local Justice Chapman Eighteen men were examined, and a more hardened looking lot of men were never held in custody by the authorities of Graham county. This means more when it is considered that Graham is the rough county of the Territory, and the rendezvous of Mexican outlaws. Dist.-Atty. C. L. Lawlins conducted the examination for the Territory, and the strikers pleaded their own cause. Their leader, "Three-Fingered Jack," cross-examined the prosecution's witnesses.

About twenty men gave evidence, their testimony showing conclusively that had it not been for the entrance into the camp last Tuesday of Territorial troops bearing the flag, and the fearless work of the deputies of Sheriff Parks earlier in the day, Morenci would have been looted and burned by the 3500 armed strikers.

The accused were all bound over to await the action of the grand jury on charges of "inciting riot." On evidence brought out the strikers leaders will probably further be charged with threatening to commit murder.

The most damaging testimony of the day was given by Superintendent McLean, who was surprised in his office Tuesday noon by the heavily-armed leader and ordered to close down the works. He was given one minute to save himself, and so he obeyed the command. McLean was told that the command McLean was told that the command. McLean was told that the command might blow up the town and loot the ruins.

The notable guests were lucky, however, to get anything to eat, and took the situation in good grace. Instead of sirioins and fancy dishes they got plain eggs and coffee.

Mille James, the actress, gave the bellboy \$2 to go to a neighboring cafe and get crackers and coccanuis for the pet monkey used in "Little Princess" company's performance. The strikers detected the attempt and robbed the boy of the monkey's meal.

President Gompers of the American Federadon of Labor will arrive tomorrow and take up the grievances of the waiters. He is depended on to bring order out of chaos.

LABOR UNION CONSTITUTION.

GOES TO REFERENDUM VOTE.

[BY THE ASSOCIATED PRESS—P.M.]

DENVER (Colo.) June 14.—It was announced coday that the new constitution of the American Labor Union, which was adopted just before adjournment of the annual convention Saturday last, will be submitted to referendum vote.

The principal change provided by the new Constitution is the centralization of power in the Executive Board, and will have the effect of reducing strikes to the minimum. Under this provision the power of declaring strikes is taken from the local unions. When any trade or craft has a grievance, the local must refer the matter to its national body, and if that body falls of a satisfactory adjustment, then the Executive Board of the American Labor Union is required to investigate the grievance. Should a strike be decided upon by this board, which has the power of declaring strikes, all affiliated unions called out must respond immediately.

CHINESE HABEAS CORPUS.

INVESTIGATION MORE RIGID. SAN FRANCISCO, June 14.-United States Court Commissioner Heacock has announced that in future investi-gations in Chinese habeas corpus pro-ceedings will be much more searching, than in the past. A clause in the Chi-

than in the past. A clause in the Chinese Exclusion Act provides that all native-born Chinese have a right to land in this country. For the first ten years after the act went into effect, no record was kept of the Chinese births in this country.

For many years, thousands of Chinese have been admitted on the ground that they were native born. All of these, or nearly all claimed to have been born during the period of time when no accurate record of births was kept. The remarkable fecundity of this period has at last aroused the suspicion of the officials. They have good reason for the belief that the Chinese have taken advantage of the loophole in the records, and have sworn faisely in hundreds of instances. Commissioner Heacock announces that the slightest evidence of collusion will be sufficient to throw the case out of court.

HERRERA-BROAD BOUT.

LOOKS QUEER TO BETTERS. SAN FRANCISCO. June 14 -- [Exclusive Dispatch.] The outcome of the Broad-Herrera fight has a strange look to local followers of the fistic same. Five days ago Broad was a strong favor te in the town where had never before boxed, and sold as a 2-to-1 choice in the betting, but gradually the aspect of things changed for no apparent reason, and there was a quantity of Herrera money left unered in this city, with the Mexican as a 10 to 6 favorite.

It has always been 'admitted that Herrera could fight if forced to do so, but not to the extent that he showed in Butte last night. A careful perusal of Broad's long record fails to reveal another instance where he has been knocked out. He has lost dozens of decisions, because he lacks style and cleverness, but nobody has ever before made him take the count.
The queerness of the betting and
the Mexican's sudden jump into pop-ularity caused the old-timers to shake their heads last night when they heard

New Organization of Mechanics to Take he Field-San Jose's Struggle.

Have Learned a Lesson from

the Luiding Lockout.

(BY DIRECT WIRE TO THE TIMES.) NEW YORK. June 14.—[Exclusive Dispatch.] "The present lock-out has been a costly one to labor, but it has served as a lesson, with the result it will be a benefit to skilled men in the building trades hereafter, so spoke John J. Donovan, former president of the United Board Building Trades in discussing the tie-up in the building

Trades.

"Never again will unskilled men in the building trades have any voice or any influence with skilled mechanics," he declared. "We were together as members of the United Board of Building Trades, of which I was president, thinking that our cause was a common one, but the skilled men in the building trades have learned, their mistake:

"The lesson has been a costly one to men in the skilled trades. Because of the demands of building-material drivers, who are unskilled, for recognition of their union, the entire building industry in the city has been tied up for over five weeks, and men are still out of work. The skilled men in the board were willing from the start to have the delegates of building-material drivers leave the board, so that an amicable settlement of the case be made, and work continued, but the drivers' delegates stubbornly declined to leave our body, and were supported in the contention by other unskilled unions in the United Board. "When delegates in the skilled trades realized the situation, we determined,

once for all, to put an end to the trouble. We have cut loose from them for good. We intend to organize a United Board of Building Mechanics, and every skilled trade has announced its intention of becoming a member of "The skilled trades which have joined

ciation steam fitters' helpers, journey man stone cutters, plain and orn brotherhood painters, smalgamated carpeniers' society, brotherhood of plumbers, mosaic tile layers, sile lay-ers' helpers, amalgamated sheet metal workers, slate and metal roofers, derrick men, riggers and painters, en-caustic tie layers, granite cutters and cement masons.

"We will also have with us the Housesmiths and Bridgemen's Union, and also hoisting engineers. When these two organizations unite with us, the organization of skilled emchanics in the building trades will be complete."

SAN JOSE, June 14.—(Exclusive Dispatch.) The strukgle is on between organized labor and the Merchants' As sociation of this city. Trades Council this afternoon means that the Team Drivers Union will be backed by all of the thirty-three un composing the federation, and twenty-two unions composing the Building Trades Council. It is prace tically the same fight waged by the unions in San Francisco two years ago against the Employers' Association. The grocery drivers walk out tomorrow morning, and the fight will be on to a finish. The merchants do not compilin of wages asked, \$40 and \$50 a month, but refuse to recognize the union by signing any agreement.

the lightning-express train went, whirling off a fifty-foot bank into the sea, has cost the Southern Pacific company a goodly fortune. For ten days past two railroad adjusters from San Francisco have been busy in Los Angeles, applying the gold cure to the possessors of disorganized anatomies and rhussed-up physiognomies.

Nearly \$10,000 in cash has already been distributed. This has settled a score of local chilms, and there are half a dozen here not yet patched up. Some of these latter cases may reach the courts in the form of lawsuits, but none have been filed as yet, and it has not been generally believed among railread men that much litigation would result from the disastrous wreck. In fact, experts on such subjects have considered the railroad company very fortunate in this respect, and the work of the railroad acompany very fortunate in this respect, and the work of the railroad company very fortunate in this respect, and the work of the railroad dompany very fortunate in this respect, and the work of the railroad agents in securing swich a large majority of settlement out of court has been considered exceptionally successful.

The \$10,000 dispensed here during the past few days has paid for individual injuries of passengers, and none of the property losses of the company have been included in that sum. The destruction of rolling stock and roadbed have doubtless more than doubled that cost.

TO BROKEN FACES. SHAMROCK SAFE IN AMERICAN WATERS.

[BY THE ASSOCIAT ED PRESS-P.M.]

N EW YORK, June 14.—Safe and sound after a rough passage from Gourock, Scotland, of sixteen days and twenty-two hours. Sir Thomas Lipton's latest challenger for the America's cup, the Shamrock III, is now lying at anchor off Tompkinsville, S. I., where she arrived at 10:20 o'clock this morning in company with the steam yakht Erin, that had towed her most of the way across the Atlantic, and by the Shamrock I, towed by the British tug Cruiser. The 136 men which manned the yachts and their othorys are all well, and there were no accidents to mar the passage. Detween Gourock and Fayal, Azores, where the steamers stopped for coal, calms and aqually weather were encountered. The Erin and her tow became separated from the cruiser and the Shamrock I before reaching Fayal, but they never lost sight of each other after leaving there. June 12, the yachts were caught in a rgale from the southeast and while it blew very hard and a heavy sea was running, very little water was shipped, and no damage was done.

etty known as Arcadia, was completed, and the count is now ready for the supervisors themselves. Regarding this census, important facts have come out, namely; that there the enumerators found more than the requisite 500 inhabitants, a large majority of whom are Mexican peons; and that unless the census report is impached, the Supervisors will probably grant the petition for incorporation. Indeed, the Supervisors will probably grant the petition for incorporation. Indeed, the Supervisors will have sothing else as an alternative, for the law requires them to grant such a petition for incorporation of a city wherever there are 500 inhabitants, and requisite metes and bounds. Litigation is probable whatever the decision of this body. In case the census report is impeached and the whole matter turned down Baldwin will "go to law," and if he is victorious with his petition the apostles of righteousness will take their inning, so that in any case the affair will go up and up to the highest tribunal in the State, in all probability, effectually preventing actual incorporation for a long term of years at least.

At the head were nine messenger boys, who, it is understood, represent large and fashlonable private parties. Special arrangements were made with the management last week concerning their places, and their numbers were given out some days in advance.

At the tead of the real line, however, stood little Joe Toplitzsky, a young working boy, barely 13 years of age. He and an older brother determined that "there was money in it," and accordingly, took their places on the pavement a little before 4 o'clock yesterday afternoon. This meant a standing wait of seventeen hours.

They were not long standing alone, however, for next to them, in an hour or so, came a couple of men, then a messenger boy, and then some persons bent on buying tickets as a speculation. Before midnight regulation rules, made up for all such cases, were formed, and numbers were given out among themselves. These rights were thoroughly respected, and when a boy dropped out for a lunch or a moment's rest, early in the wee small hours, his place was zealously guarded by his fellows.

The seat sale opens at 9 o'clock this morning, and it will be both a hummer and record-breaker. Len Behymer, assisted by Mr. Neilson, will be in charge. The box office will remain open until 9 o'clock in the evening.

Undoubtedly E. H. Sothern, who will open the house, stands at the head of today's exponents of the poetic romantic dramm, and "If I Were King," the present vehicle of his talents, is foremost among romantic plays upon the contemporary stage.

of the Building Committee yesterday, but the Councilmen failed to get tagether. It is understood that two of them, Nofziger and Farish, favor the block bounded by Eleventh, Twelfth, Flower and Figueroa streets.

There seems to be an inclination, in spie of personal choice among those who will take the proposition through its preliminary stages, that the people at large should be consuited as freely as possible, so that when the matter is submitted to a vote, it will not be defeated.

In view of the fact that the \$2,180,-

In view of the fact that the \$2,180,000 bonds are still unmarketed, and
that the convention hall and site will
entail an exenditure of \$1,000,000 more,
it is believed that there will be considerable opposition to making haste.
"I believe that those having this
matter in charge should proceed slowly
and with deliberation," said Mayon
Snyder. "They should let the people
fully understand what is to be submitted to them at the election, and
then if the preliminary work is done
wisely, and the people are confident of
this, the bonds will carry. Of course,
the problem now before us is to market the bonds recently issued. Until
we do this we will not know what rate
of interest to place on the new ones.
I think that these bonds will be disposed of shortly, but the building of
the convention hall is a big proposition, and should not be unduly
hastened.
"As far as possible public sentiment."

terest to Owners of Stores.

The proposition to establish in 2 Angeles an auxiliary fire-alaym tem, application for which has be filled with the Board of Fire Commissioners, is a matter of more than use interest to merchants who own lar, stores, especially those in the wholess district, and to the large retail establishments. The purpose of the me system is primarily to give them he ter fire protection by making it of allowing to the series of th alarm. On the second and alarm. On the second and case of fire an arrow on this consultation of the numbers on dial corresponding with the floor the building. If the fire was on third floor the arrow would point it." or to such other mark as more be used to designate that floor or portion of it.

It is unnecessary to say that there is no just cause for offense in this matter. The President, in directing the prosecution of the case against the Northern Securities Company, did neither more nor less than his duty. The result of the prosecution has demonstrated the need for it. The Northern Securities Company has been declared

boweled it, and cut its throat before the mother's eyes. After this the mother was shot. Here is another example of Belgian flendishness:

"Four chiefs and twenty-six men were murdered, two of the leaders being tortured in a fashion that seemed almost incredible. A cross pole was run along on three upright posts driven into the ground, after which the two victims were suspended to the crossbar by cords attached to their necks and feet, orders being given that they be left in this position. While thus suspended, a European doctor amused himself, the commandant and the spectators by removing the scalps of the men, while his black servants sawed through their shin-bones and cut off their noses and ears. Other villainies practiced upon them cannot be printed. At the end of the day the two men, who were in a dying condition, were shot through the head and flung into the bush."

All of this takes place under the rule of a nominal Christian country, and in the twentieth century. It is no wonder that the Belgians are beginning to grow restive under the rule of a monarch who is a notorlous profligate and a promoter of public gambling houses. It is certainly a proper question as to how far the civilized nations of the world are fustified in ignoring brutally how far the civilized nations of the world are justified in ignoring brutalities of this kind which take place outside of their own territory. If a man, in a civilized country, is discovered beating his wife, or torturing his children, he is arrested by the police. After the Looloos had tried Tapioca for a while yesterday in the first course, they finished the feast on Ham. They had a great meal of it, and a great crowd watched them at it. It was an easy 5000 crowd of fans that SIWASHES BUMPED. [BY THE ASSOCIATED PRESS-P.M.] SEATTLE (Wash.) June 14.—Carrick, formerly with the New York National was an easy 5000 crowd of fans that forced liself into Chutes Park to see the closing wake on the Irish, and it really was a wake, too, for Hank's bunch was an aggregation of desid ones. Few of them could hit the ball and when some of them tried to field it, it was a case of turn your face away without losing any time, and wait until some one said you could look again. League team, pitched fine ball for Scatt'e today and scored a shut-out. Butler also pitched swell ball, and but one error was made during the game. Score:

them threw the ball around, and old Taploca Hodson was like a dirty deuce in a new deck. The only way he could have gotten the ball to first base was to have carried it there in a basket, for when he tried to throw it, the fans had an idea he was afraid of hitting Pabat in the hands with the thing. When that kind of business was put on in the first act, it was back to the south of Market street for Hank.

With the Looloos playing a perfect game, it might appear that the Irish could have done as well, but it was not in them. From the fact that they made seven errors, six of which resulted in runs, it is painful to see

This was more than necessary, but mo more could be had for any price, for Iberg tightened up and only allowed three scattering singles in the remaining four innings. He was hit for eleven altogether, and this collection was enough to win two games.

The bright features of the game were the fine work of Ross in left field, his sure batting, and the stick work of Wheeler and Toman. All three played star baseball in every way, and the other Looloos did equally as well in the field, but had great trouble in hitting Iberg. The locals certainly put up a stiff game, and well deserved their victory.

The capture of several fair-sized salmon trout by Harry Slotterbeck and E. W. Hopperstead Friday was the sensation of the week in fishing circles. While the catch was very small, and in numbers far from a reward for the half-day that the pair put in looking for a certain illy-described and well-secluded spot on the San Gabriel, where rumors of huge trout were born, both gentlemen had hold of enough big fellduring the day that gave promise of eventually becoming a respectable fish, but nothing short of a diet of shot would have made him weigh a pound and a half. REAL LIFE OF PEOPLE IN BELGIUM.

DEGGY wanted to go to Europe, and being an energetic young woman, she constituted herself a ways and means committee to bring about the trip. Her salary was \$18 a week, and at the time the desire took possession of her she had saved only \$5. The outlook was not promising, but trifles never discouraged Peggy. She sent for circulars of various personally-conducted touring parties, and found that in traveling by these she must allow \$500 at least for six months, and in many instances much more would be needed. She saw also that though by these she was saved a great deal of trouble she was likewise kept from getting near to the people of the country she visited, and that any trip so made would take her mainly over beaten paths of which she had read until she knew them by heart and could shut here eyes and make pictures to herself of what she could see. Thanks to the discovery of the half-tone process, it has been possible to bring Europe close to American eyes.

far as his fellow-citizens were concerned. The Ambassador was far more gracious, and won Peggy's enthusiastic gratitude by his kindness.

Reggy found a living place to her mind in the best part of the city, and she still looks back to her life in that lodging-house as a model of what that kind of life should be. She had a comfortable room, open fire, breakfast, afternoon tea, dinner of four courses, served by a man servant in her room, her boots were blacked each night, the maid was ready to take her wraps when ahe came in, and never too busy to run out with a letter to post or to do any other errand, and for this comfort Peggy paid 36 a week. To the maids and the man she gave small fees, as they did her services, but the fee always was small and the service cherrully given. Certainly the English know the art of graceful and comfortable living.

Most of Peggy's English experiences were gained in London, and her four months there were all too few-such old-world nooks as she used to find—such unexpected turnings into by-ways where history was made. London is wonderfully interesting and a perfect storehouse of somances of real life.

In her traverup Peggy always went first class, except once in each country

to see what the recommodations of second and third class were. She went first class because she was more comfortable. She had lived in real comfort, never stinting herself of a need, and often gratifying a wish, and her entire trip cost her 4450. She could go now and spend a year for that sum, and for less if she went with a friend to share room, fuel, lights and carriage hire, which are but little more for two than for one. She never could have had this experience had she lived in hotels run for Americans. Three months of that living would have eaten up what she had, and she would not have had the foreign almosphere that she got by living just as she did, and she regarded her trip as a success.

women of the city have come to the conclusion that they don't like the manner in which the men have laid out the parks, or are laying them out. They think that their valuable services in the way of suggestion should have been solicited, and they are thinking seriously of calling a mass meeting of the fair sex to discuss the matter. If this mass meeting is decided upon Mrs. Robert J. Burdette will likely be asked to address it. Mrs. Burdette has some interesting ideas on civic matters and knows how to express them, as everybody is aware. As yet, however, the subject has not been broached to her. "The trouble with men," said one woman park agitator "yesterday who wouldn't have her name in the paper for the world, "is that they don't know anything. Anyway they don't have any ideas on colors and the arrangement of objects for artistic effect. Put a man in a room and he immediately picks out the objects in it that are bright red. He sees nothing else. He doesn't know any more about whether the pictures are hung in the proper places and the furniture in harmony with the carpet and wail paper than he does about the hang of a skirt. It's the same way outdoors as indoors. Put him to beautifying a piece of ground and he immediately pulls up the trees in it and stirs up the ground and plants something bright red or yellow or blue. Now, if you will look on the assessment rolls you will find that a goodly proportion of the taxes of this city are paid by women. Yet the" don't get a hand in distributing the money that they contribute. That's what this mass meeting is going to be about."

SANTA MONICA. "GO-DEVIL" WENT WRONG.

SANTA MOMICA. June 14.—The horse had the laugh on the automobile here Saturday. It was a case in which the equine, had it been able to express its quadruped feelings in verse, would have burst out with a stanza about "Otto and his auto that would'nt auto when it ought to." The "go-devil" rolled a merry nece from Lox Angel. "Otto and his auto that would'nt auto when it ought to." The "go-devil" rolled a merry pace from Los Angeles, or somewhere else up the country, and, thirsting for salt water, came down along the beach. When the ponderous red machine got its front tires fairly into the brine the thing became intoxicated and went mad. The driver was overcome in the struggle between steam and driving power. It was a case of irresistible force refusing to be controlled by a governable mechanism, and the blood-red, seamad charlot waded in the briny. When it had been stopped and the waves rolled up and threatened to engulf it and imbed it in the sands efforts were made to draw it up out of the sea, but it refused to be drawn. At every pull it managed to work itself a little deespr into trouble. After many unsuccessul efforts to rescue the machine by man power a requisition was dispatched to a livery stable and the triumphant horse drew the things of shafts and cogwheels up onto dry land.

Angeles-Pacific Railway, a score of members of the Pacific Coast Traffic Agents' Association from Los Angeles had an enjoyable outing here last evening. The party came down in a special car in the record time of 28 minutes, and this would have been reduced to 25, had three minutes not been lost flagging a train.

Miss Larry Harkness of Erie, Pa., was the lone female member of the party. Most of the railroad men took a dip in the ocean or lagoon, Mrs. L. L. Hughes then served them with a "Dutch lunch." The "Fat Men's Quarteste," composed of Messrs. Ochiltree, Beicher, Huggins and Ben Coons, rendered selections and did dancing stunts. "Prof." Stewart and Miss Harkness sang. Toasts were drunk to the host. Mr. Fife, Mrs. Hughes and the hotel force, and the return trip was made near the midnight hour.

Those who enjoyed Mr. Fife's hospitality were: G. E. Ochiltree, F. R. Maulsby, Henry Huggins, B. Pitman, H. H. Francisco, H. A. Beicher, Leo L. Gibson, George L. Travis, A. A. Valentine, W. W. Elliott, E. V. Musselwhite, A. M. Shook, M. F. Van Hom, R. W. Clark, B. F. Coons, R. A. Thielen, C. H. White, H. F. Clark, F. S. McCormick, Leo G. McLaughlin, George J. Bleck, W. H. Bullen, Don

G. Fisher, Charles V. Eccleston, L. L. Rice, Harold C. Fisher, W. E. Fessender, F. M. Byron, E. H. Garrison, H. F. Stewart, L. B. Valla, C. Haydock, George Ketchum, Timothy Mee, A. P. Yarrington, Miss Larry Harkness.

COLLEGIATE NOTES. branch of greasewood filled with yellow "rolden thread" or dodder, Rev. Henry Kingman preached a terse and unique sermonette at the children's service this morning. It was the lesson of "paramorning. It was the lesson of "parasitism," so clearly illustrated in this "golden thread" which saps the nour-ishment from the greasewood branch, loses its own roots and leaves, kills the branch on which it feeds and thus ends its own life. He applied the lesson to child life at home, to one's relations with the church, with the world and with God.

Modern Watches For Men.

The day has passed when it was deemed necessary for a man's watch to be heavy and clumsy in order to be serviceable. The new, modern, gentleman's watch is thin ank shapely, combining beauty and durability; in size, a happy medium, large enough for all practical purposes— not so small as to interfere with accurate time-keeping quality. Our watch stock is replote with modern ideas.

opening the front door of the house went
at once to Russi's room, but did not
enter the bother apartments. He secured \$3.50 and a silk necktie.

During the absence of several Japanese from the house occupied by them at No. 254 Winston street late Saturday night, a burgiar forced an entrance to the place and thoroughly ransacked it. With a meat cleaver the burgiar demolished trunks and dressers, and made a thorough search for valuables. He was evidently looking for money, for, although there were a number of articles of value in the place, but few were missed. The thief was frightened away.

A class of more than fifty boys and girls received their first communion at the 8 o'clock mass yesterday morning at 8t. Joseph's Church. The children have been under the instruction of Rev. P. SPECTACULAR CONFLAGRATION

Chutes Balloon Burst Into Flame in Mid-air, but Luckily the Aeronaut Had Cut Loose.

yesterday's big crowd at the Chutes by the regular balloon ascension and para-chute return of Aeranaut George Ri-naldo. At about 5:30 o'clock, just after the daring air climber had cut loose from the balloon and begun the descent in the parachute, the big black gas bag burst into flame high in air. So com-plete was its destruction that little more than the big iron mooring ring

ever reached earth.

Luckily there was no catastrophe to human life connected with the spectacular event, although one was nar-rowly averted. The heavy sand bag carried as ballast dropped from a great height, and passing out of range of the

mid-air aeronaut, plunged through the iattice roof of the shelter over the boat landing beyond the foot of the chutes, missing the head of an attendant by a few inches.

In inflating the balloon a spark had evidently become lodged in the bag,

and the minute it turned over in mid-air as the balloonist cut loose, a draught of air entered and fanned it so that the gas became ignited. Comment was made by superstitious park attend-ants upon the fact that the disastrous ascent was the thirteenth made by the balloon. The loss will amount to about \$159.

New features drew a large crowd to the amusement park yesterday, and ex-citement was great among the throng during the skyward conflagration.

Hay-Biddle Gang Holds Council of War-Will Demand Separate Juries.

If the plans of the officials of the Home Telephone Company are carried out, the four striking linemen who at-tacked a party of the employés of that ration Saturday Castellar street, may find themselves in serious trouble. It is now proposed to prosecute the gang, not for battery only, but for conspiracy to incite a riot, the penalty for which is much more severe than that for simple as-

The attack upon the linemen who re-fused to kneel to walking delegates and other disturbers of the peace, was but the culmination of trouble which had been brewing for several weeks. Ever since the linemen's strike was inaugurated, the strikers have seemingly centered their efforts against the workmen of the Home Telephone Company. Possibly the reason was that the company just now has more work which linemen must do than any of the company just now has more work which linemen must do than any of the older companies. Whenever a party of workmen was sent out by this company, it was followed from place to place by members of the striking union, and every effort was made to induce the workmen to join the strikers. One or two men have been led by threats or otherwise to quit, but nearly all the employes of the company remained at work. This only caused the strikers to redouble their efforts, and in this they were assisted by walking delegates of the Hay-Riddle gang, who knew nothing of the business.
